PROFESSIONAL SUMMARY

Frontend Developer currently pursuing an M.Sc. in Information Technology at TH OWL with hands-on experience developing responsive web applications using Angular, TypeScript, JavaScript, HTML5, CSS3, REST APIs, and Git in Agile environments. Experienced in building reusable UI components, integrating RESTful services, and collaborating with interdisciplinary teams. Currently expanding my expertise in React, modern SPA architectures, cloud-native development, and CI/CD practices. Passionate about building scalable, maintainable enterprise applications and eager to contribute to SAP Pioneer's cloud-native frontend products.

PROFESSIONAL EXPERIENCE

Research Assistant (Wissenschaftliche Hilfskraft) inIT – Institut für industrielle

Informationstechnik, TH OWL | November 2025 – Present | Lemgo, Germany

Projects: PD Assist Parkinson Monitoring App | AI-Assisted Learning Interaction Study

- ▶ Developed responsive Single Page Applications (SPA) using Angular, TypeScript, HTML, and CSS.
- ▶ Built reusable UI components and integrated REST APIs following modern frontend development practices.
- ▶ Collaborated in an Agile software development environment using Git for version control and feature-based development.
- ▶ Worked closely with researchers and developers throughout the software development lifecycle, from requirements gathering to deployment.
- ▶ Contributed to application deployment, documentation, testing, and continuous improvement of research software.

Software Development Intern

Camino Infotech Kochi Pvt. Ltd. | 2022 – 2023 | Kerala, India

- ▶ Delivered full-stack web features using MVC architecture; implemented and tested REST APIs with secure coding practices in a production software team
- ▶ Managed collaborative version control for multi-developer repositories using Git and GitHub, maintaining clean branching strategies across project milestones

EDUCATION

M.Sc. Information Technology

TH OWL – Technische Hochschule Ostwestfalen-Lippe | March 2024 – Present | Lemgo, Germany

B.Tech Computer Science & Engineering

APJ Abdul Kalam Technological University | June 2019 – April 2023 | Kerala, India

KEY PROJECTS

PD Assist – Parkinson Patient Monitoring App

inIT TH OWL · Research Project · Stack: [Flutter](#) · [Python](#) · [Hive](#)

- Delivered cross-platform Flutter mobile app with Python/Hive backend, reducing participant data entry friction and improving overall data completeness for the research study

AI-Assisted Learning Interaction Study – Research Platform

inIT TH OWL · Research Project · Stack: [Angular](#) · [Python](#) · [MongoDB](#) · [REST APIs](#) · [Nginx](#)

- Developed responsive web interfaces using Angular and TypeScript while focusing on usability, accessibility, and clean interaction design. Built reusable UI components, integrated REST APIs, and improved user workflows through iterative interface improvements.

Aircraft Nose Gear Pose Estimation – Deep Learning System

Master Research Project · Stack: [Python](#) · [PyTorch](#) · [ResNet18](#) · [CNN](#) · [Monocular Vision](#)

- Achieved 91.5% accuracy on unseen test datasets using a ResNet18-based monocular vision system; systematic data-driven debugging reduced validation error rate by ~30% over baseline

Alzheimer's Disease Detection – Published Research

NACORE 2023 International Conference · Stack: [Python](#) · [ResNet](#) · [DenseNet](#) · [Deep Learning](#)

- Developed a diagnostic support model using ResNet and DenseNet architectures; research findings accepted and published at NACORE 2023

Municipal Corporation Complaint Management System

Academic Project · Stack: [Next.js](#) · [Firebase](#)

- Designed and implemented a user-centered web application with intuitive navigation, responsive layouts, and accessibility-focused interface design. Planned screen layouts and user flows to simplify complaint submission and tracking.

TECHNICAL SKILLS & COMPETENCIES

Frontend Development

Angular, HTML5, CSS, JavaScript, TypeScript, Responsive Web Design

Backend Development

Python, Node.js, REST APIs, MongoDB, Firebase

Mobile Development

Flutter (Dart) – iOS & Android

DevOps & Deployment

Nginx, Git, GitHub, VS Code, CI/CD

Soft Skills

Agile Collaboration, Research Methodology, Technical Communication, Problem Solving, Team work

CERTIFICATIONS

Wheeled Mobile Robots

NPTEL

Java Programming

Oracle Academy

Figma for UX/UI Design

LinkedIn Learning

Programming in C

Coursera
